

## Project Engagement Alternatives

**JSC Global Solutions** is a versatile and flexible IT and BPO solutions organization that can engage with you in several ways. We strongly feel that this distinguishes us from other IT and BPO

companies that are either entirely business or technology focused or are only capable of handling projects of a certain size. This is where JSC Global Solutions is different!

With our in-depth industry knowledge coupled with project management and technical expertise, we can help you in a variety of ways, including:

- Implementing a **complete solution** on a **turnkey basis**. This involves handling a project from **initiation** to **implementation** and **training**. We also partner with our customers in **exploring financing options** for the project.
- The **development** can be done **on-site or remote**. If appropriate, we can **leverage** our **off-site development center**, to provide **significant cost savings** to you.
- Once ready for implementation the system can be **deployed** in your organization or **we can host** it for you.
- Providing **on-going support**, both **in-house** and **remote**, or train your resources to support the system.
- **Augmenting an existing project team** by providing vital expertise in project management, business analysis, and technology areas- this could be for **short term** or **long term** needs.
- **Managing** or assisting **Project Initiation, Cost Benefit Analysis, and Vendor Analysis** phase of projects.

**The Bottom Line...** We are flexible and attuned to what your company needs and we can engage in a manner that will maximize benefits for you while delivering high quality solutions that exceed your expectations!
