

## Project Implementation Methodology

### Initiation Phase

- Understand and document high level requirements
- Create a high level architecture/design blueprint
- Create time and cost estimates
- Formalize proposal and RFP response

### Requirements Phase

- Finalize detailed requirements
- Sign off requirements
- Refine and finalize time line and costs
- Define iterations and publish detailed project plan
- Finalize architecture and detailed physical design

### Construction Phase

- Complete detailed design specifications
- Complete coding and unit testing
- Conduct internal & external walkthroughs of functionality
- Obtain sign off on functionality

### Testing Phase

- Conduct and complete internal system testing
- Deploy functionality for user acceptance testing
- Conduct and complete user acceptance testing
- Incorporate all corrections and modifications
- Obtain acceptance sign off on functionality

### Implementation Phase

- Deploy pilot
- Run systems in parallel if replacing an existing system
- Cut over to new system
